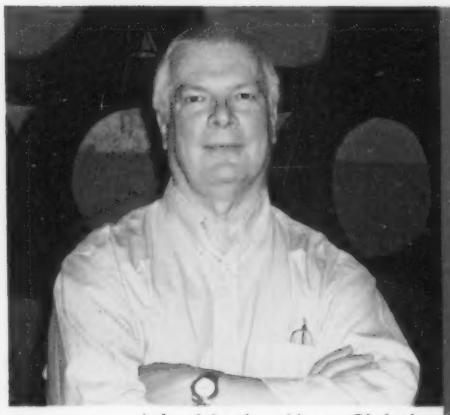
"Paramount Die has been there with us since the beginning."



John Martin - Hope Global

Is your company utilizing the most advanced die technology available? Meet someone who is...

"At Hope Global we are proud of our state-of-the-art wire draw department where we take the deepest draws from 0.218 direct to 0.027" at the highest speeds (up to 10,000 feet per minute). Paramount Die has been there with us since the beginning. We rely on the quality of their dies and on time deliveries to keep us going. Their sales force understands our process and has been instrumental in our success. I look forward to working with Paramount Die in the future both as a supplier and a partner in developing our potential."

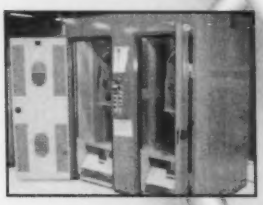
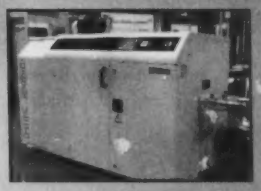
State-of-the-art equipment for the latest in stranding, twinning & cabling solutions.



HK-560L Horizontal Double Twist Buncher for manufacturing Unilay and Concentric Wire strand.

Simple to install, operate and maintain.



PV6D Backtwisting Payoff capable of handling up to 24" reels for LAN cable. Backtwisting to get you where you want to be!

Features:

- Rugged construction with steel bow design allowing for lower friction and gentler wire path.
- Use of 3" diameter Sheaves throughout the entire wire path.
- Automatic take-up tension control, variable in 256 steps, from empty to full reel. Load cell is available on HK-560 models.
- Complete selections of machines for Ultra thin wire, Unilay and Concentric, Litz, automotive, medical, twinning and cabling in tubular, single or double twist.
- Complete systems are available with our state of the art tension control payoffs: single, multiwire, twinning, cabling and backtwisting.

SCRAP HAPPENS!

"Off-spec wire is literally a thing of the past since we intstalled the Sweed Chopper—it's just more efficient to process scrap where it happens."

SWEED OFFERS:

- Wire and Cable Choppers
- Separation Systems

SOLUTIONS TO:

- Off-spec wire
- Beginning of run waste
- End of run waste

CHOPPER ADVANTAGES:

- Reclaim unused materials
- Chop and separate ferrous and Non-ferrous materials
- Self-feeding/Despooling
- Reduce scrap by a 20:1 ratio
- Convert scrap wire into cash
- Reduce dumping fees
- Increase productivity
- Reclaim space for production

For more information about chopping linear scrap at the point of generation visit sweed.com or call 1-866-507-3666
